

Microsoft Teams Phone Summit - Day 1 am

Teams Reporting & Analytics

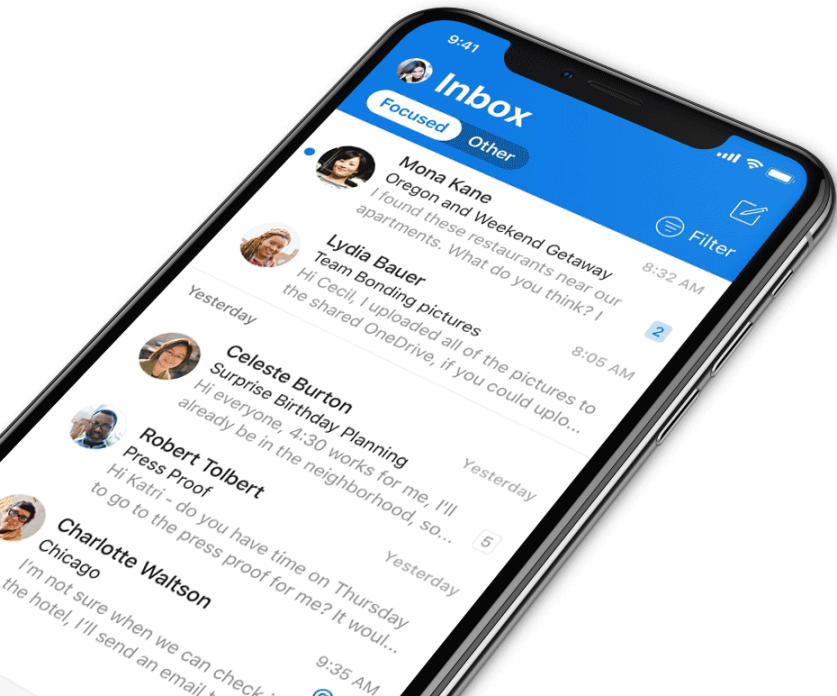

Mary Beth Kirk & Jeff Baart

Digital Event Code of Conduct for Microsoft Webinars:

Microsoft's mission is to **empower every person and every organization on the planet to achieve more**. This includes all Microsoft events and gatherings, including on digital platforms, where we seek to create a respectful, friendly, fun and inclusive experience for all participants.

- We expect all digital event participants to uphold the principles of this Code of Conduct, which covers the main digital event and all related activities. We do not tolerate disruptive or disrespectful behavior, messages, images, or interactions by any party participant, in any form, at any aspect of the program including business and social activities, regardless of location.
- Microsoft will not tolerate harassment or discrimination based on age, ancestry, color, gender identity or expression, national origin, physical or mental disability, religion, sexual orientation, or any other characteristic protected by applicable local laws, regulations, and ordinances.

We encourage everyone to assist in creating a welcoming and safe environment.

We will mute your microphone for the first part of today's call

Ask your questions via chat, we will get to all of them, live or after. Common questions will get addressed out loud.

We will be posting all recordings to the Microsoft CommUnity Connection YouTube channel approximately 2-3 days after the session has finished. Subscribe here to get updates
<https://www.youtube.com/@TeamsPhoneCommUnity>

Teams Phone Summit Schedule

Tuesday, March 5th	Wednesday, March 6	Thursday, March 7
10:00am – 11am EST Teams Reporting and Analytics	10:00am – 11am EST Using Intune when Deploying Teams Phone Devices	10:00am – 11am EST Exploring AI Innovation in Teams Phone with Copilot and Teams Premium
1:00pm – 2:00pm EST Adoption Change Management with Teams Phone Deployment	1:00pm – 2:00pm EST Teams Phone Roadmap	1:00pm – 2:00pm EST Teams Phone Devices for your Organization

Next Steps

Foundations

The background of the slide is a solid dark blue. Overlaid on this are several large, overlapping circles and semi-circles in various shades of purple, lavender, and light blue. The shapes are arranged in a way that creates a sense of depth and movement, with some shapes appearing to be in front of others. The overall aesthetic is modern and minimalist.

Foundations

Use [Teams Admin Roles](#) and scale visibility to media quality

- New [Role Announcement](#) - Teams Telephony

Role	View Call Analytics	View reports	View EUI fields	Create reports	Upload building data

Quality/Reliability Checklist

There are 7 key configuration areas to validate – start here

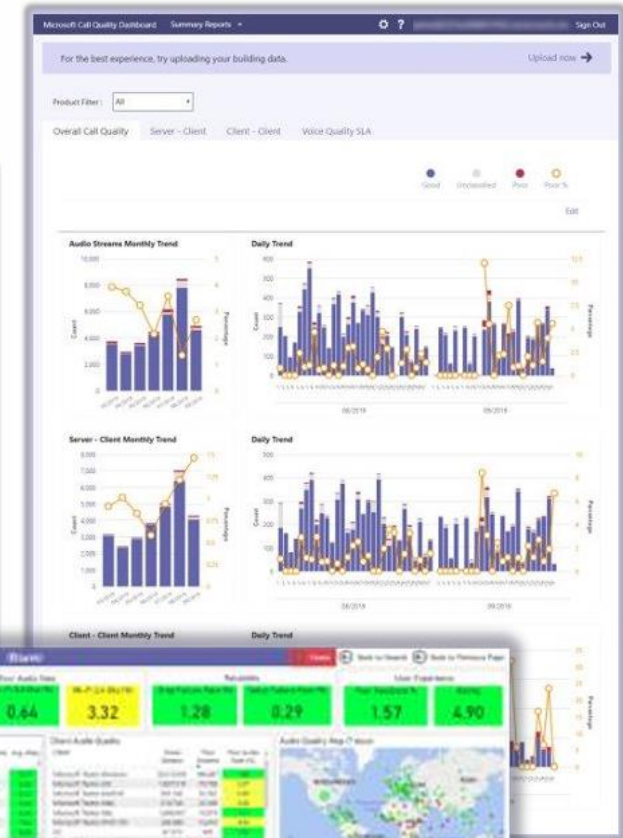

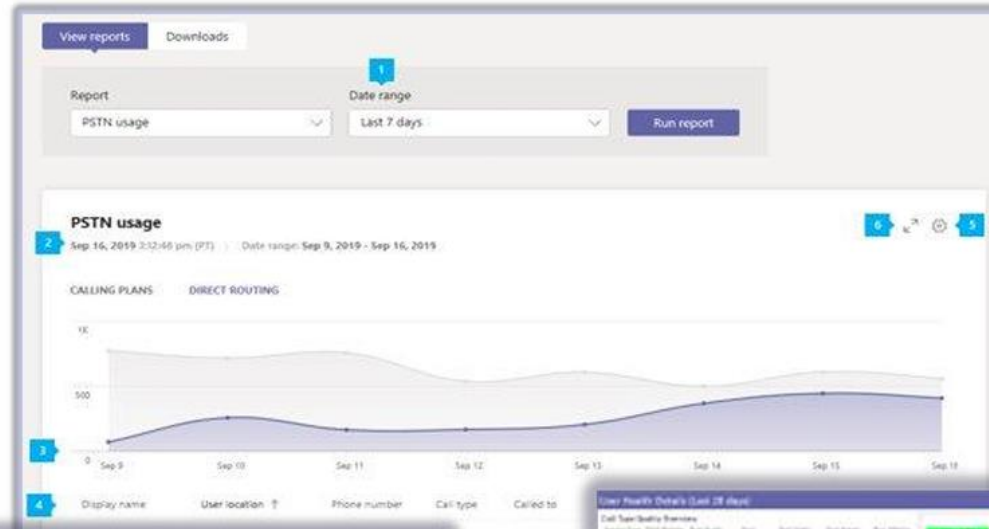

NOTE: Some of these changes can have perceived security risks, please see the [Teams Security Guide](#) to understand how we ensure the security of our traffic.

- 1. Ensure the right ports and protocols are open**
Subnets, 13.107.64.0/18, 52.112.0.0/14, 52.120.0.0/14 and Ports: UDP 3478-3481 & TCP 443 are needed for Teams signalling and media traffic.
- 2. Bypass proxy and deep packet inspection**
Bypass on-premises and cloud-based proxy and inspection services commonly used for Internet browsing.
- 3. Implement split tunnelling for VPN solutions**
Facilitate direct connectivity to these cloud endpoints for VPN users by implementing split tunneling.
- 4. Exclude important processes from anti virus/DLP scanning**
Excluding teams.exe, for example, from scanning keeps them from interrupting the operation of team which can lead to slow system performance.
- 5. Local DNS resolution**
Microsoft services are deployed globally and use geo-based DNS and Anycast IP to load balance and allocate services closest to the endpoint.
- 6. Take the shortest path to the Internet**
Route traffic to the Internet as close as possible to the endpoint. This ensure traffic enters the Microsoft managed network faster with fewer hops and points of failure in between.
- 7. Deploy Quality of Service (QoS) where needed**
In congested networks, media workloads should be prioritized into proper queues to protect packets on managed networks.

Designate a Quality Champion

It's the role of the quality champion to identify trends, take ownership, and drive remediation

[Become a Champion](#)

This screenshot shows the "Meetings & Calls" section of the Microsoft Call Quality Dashboard. It displays a table of meetings with columns for "Meeting ID", "Start time", "End time", "Participants", "Duration", "Activity type", "Client", and "Audio quality". The table lists several meetings, including "Meeting ID: 10000000000000000000", "Start time: 2019-09-10 10:00:00", "End time: 2019-09-10 10:05:00", "Participants: 2", "Duration: 5 minutes", "Activity type: Call", "Client: Multiple", and "Audio quality: Good".

Meeting ID	Start time	End time	Participants	Duration	Activity type	Client	Audio quality
10000000000000000000	2019-09-10 10:00:00	2019-09-10 10:05:00	2	5 minutes	Call	Multiple	Good
10000000000000000001	2019-09-10 10:05:00	2019-09-10 10:10:00	2	5 minutes	Call	Multiple	Good
10000000000000000002	2019-09-10 10:10:00	2019-09-10 10:15:00	2	5 minutes	Call	Multiple	Good
10000000000000000003	2019-09-10 10:15:00	2019-09-10 10:20:00	2	5 minutes	Call	Multiple	Good
10000000000000000004	2019-09-10 10:20:00	2019-09-10 10:25:00	2	5 minutes	Call	Multiple	Good
10000000000000000005	2019-09-10 10:25:00	2019-09-10 10:30:00	2	5 minutes	Call	Multiple	Good
10000000000000000006	2019-09-10 10:30:00	2019-09-10 10:35:00	2	5 minutes	Call	Multiple	Good
10000000000000000007	2019-09-10 10:35:00	2019-09-10 10:40:00	2	5 minutes	Call	Multiple	Good
10000000000000000008	2019-09-10 10:40:00	2019-09-10 10:45:00	2	5 minutes	Call	Multiple	Good
10000000000000000009	2019-09-10 10:45:00	2019-09-10 10:50:00	2	5 minutes	Call	Multiple	Good

Scenarios

Scenario 1 – Getting Started

Unleash the power of Call Quality Dashboard data with Power BI.

Download our customizable Power BI templates.

- **(QER) Quality of Experience Report (v4.9)** – Teams meetings & calling
- **QER MTR Report (v1.1)** – Teams Rooms (Windows & Android)
- **QER PS Report (v1.0)** – Teams Phone System (SBC & PSTN/Direct Routing)
- CQD Teams Auto Attendant & Call Queue Historical Report

Before you can use these PBIT files, you'll need to [Install the Power BI Connector for Microsoft CQD](#) using the *MicrosoftCallQuality.pqx* file included in the [download](#).

Make sure you have the right [CQD access role](#) to access the Power BI reports.

Scenario 1 – Getting Started

Be Proactive – Get started with [CQD in Power BI](#) (v4.9 current)

The screenshot displays the CQD in Power BI dashboard interface. It features a grid of report tiles. On the left side, the 'Search' tile is highlighted with a red box. In the bottom-left section, the 'Managed VPN or Estimated VPN' tile is highlighted. On the right side, the 'Top 10 Network', 'Transport', and 'Building Data' tiles are each highlighted with a red box. The dashboard includes various sections for media usage, health details, setup, reliability, audio/video health, sharing health, and network metrics. A footer note states: 'ISP information provided by Neustar' and a disclaimer: '*This template is provided as-is and is not supported by Microsoft.' A help icon is located in the bottom right corner.

Pro Tips:

- Leverage [Teams Admin Roles](#) – have a team review quality
- Publish to PowerBI Service and Pin in Teams
- Unified Workshop Offerings – Media Foundations and Quality Assessment

Scenario 2 – Upcoming Large Meetings

Planning

- Know who is speaking, presenting and attending
- [Teams Real Time Analytics](#)

Resources

- [Virtual Event Playbook](#)
- [Microsoft 365 Live Event Assistance Program](#)

Improve Overall Quality – Apps in Teams

- Improve video and audio quality – no fuzzy image or choppy audio
- Reduce load and delay while improving computer response during meeting

Scenario 3 – Case of the Bad Executive Meeting

- ① QER in PowerBI – Familiarize with [measurements in CQD](#)
 - Search Tab – find meeting by meeting ID or UPN
 - Drill Through – Conference Details
- ② Analyze overall meeting
 - Filter Public IP and Private IP network for commonality
 - Analyze network statistics by user, by IP, and public network/carrier
 - Analyze individual user data
 - WiFi/Connectivity/Roaming
 - Compute and peripherals
 - OS and Teams version
- ③ Compare to optimized network experiences

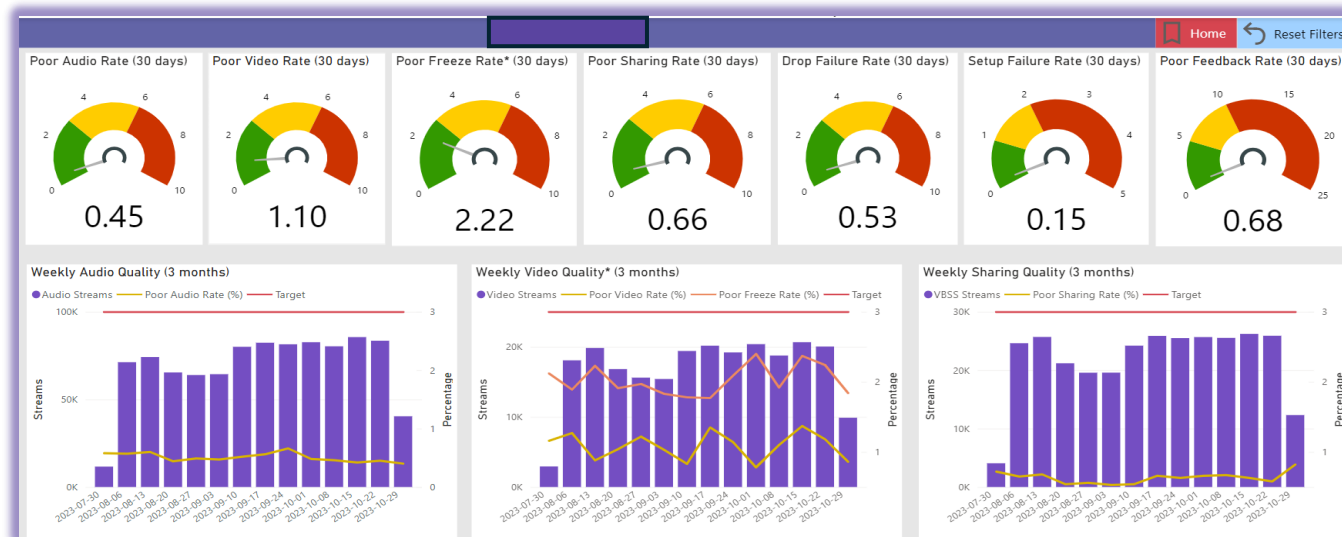

Pro Tips:

- Use Teams Premium Alerts for [Audio](#) and [Video](#) Quality alerting
- Unified Workshop Offerings – Teams Premium Optimization – Teams Media Quality Assessment

Scenario 3 - The Good

Teams Experience Overall

- Overall tenant and experience health very positive
- 99.9% Transport using UDP – optimal over TCP
- Video quality well within optimal criteria
- Teams client versions updated

Transport	User Count	Total Streams (%)	Avg Network Jitter	Avg Network Jitter Max	Avg Jitter	Median Jitter	Avg Jitter Max	Avg Round Trip	Median Round Trip	Avg Round Trip Max
UDP	3,910	99.92%	12.64	181.21	2.46	2.00	15.47	53	44	190
MultiHostTCP	29	0.02%	24.15	507.80	4.06	3.00	28.90	97	58	865
TurnTCP	29	0.02%	25.77	844.43	6.53	5.00	61.37	190	109	1565
CompoundTCP	22	0.01%	25.79	922.86	3.80	3.00	36.61	105	95	954
TCPHostActive	22	0.02%			3.62	1.00	32.58	155	58	747
MultiTurnTCP	8	0.01%	51.62	1,405.77	4.91	4.00	72.52	127	108	1713

The Case of the Bad Executive Meeting

17 Attendees
6 with poor experiences

- ✗ Home networks/wifi contributing poor experience due to packet loss (4 users)
- ✗ Packet Loss greater impact than Round Trip Delay and Jitter
- ✓ 3 users on iOS/Android (Mobile) – quality good
- ✗ 1 iOS User dropped – network disconnect
- ✓ Device CPU utilization good – no insufficient CPU triggers
- ✗ Packet Loss on outbound more prevalent (user to service)
- ✗ Asymmetric congestion/packet inspection
- 💡 Building data file will assist in VPN user identification

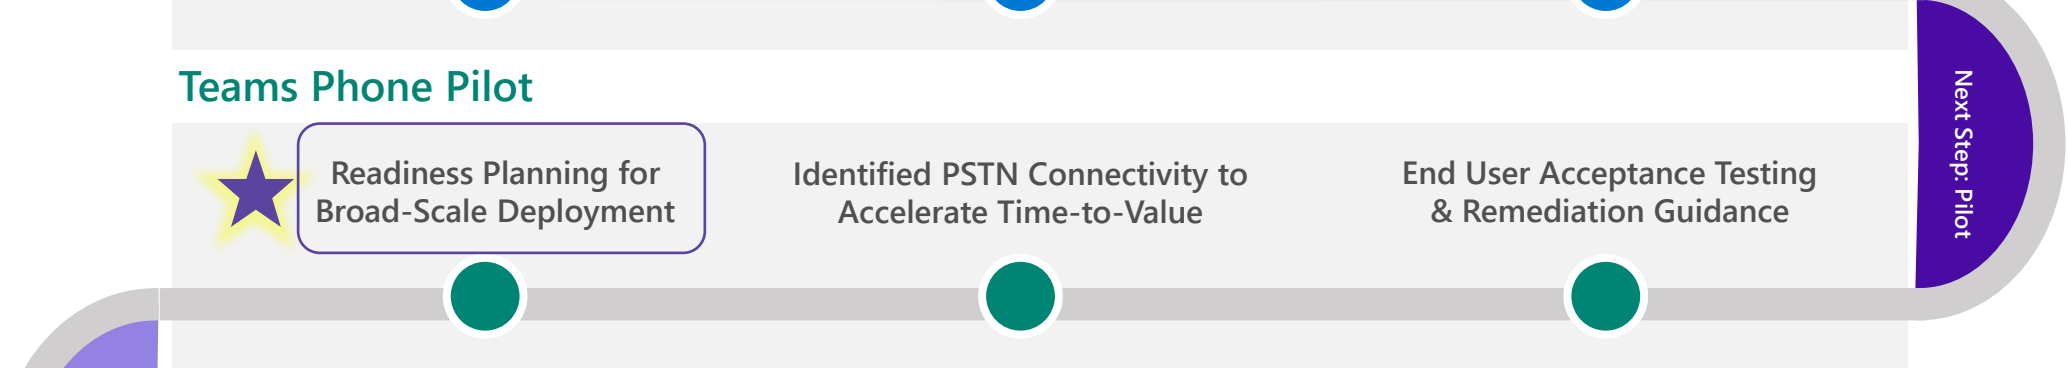

Media Type	Stream Direction	Avg Jitter Buffer Size (Audio Only)	Max Jitter Buffer Size (Audio Only)	Avg Network Jitter (Audio Only)	Max Network Jitter (Audio Only)	Avg Jitter	Max Jitter	Avg Packet Loss Rate	Max Packet Loss Rate	Avg Round Trip	Max Round Trip

New App – Call Record Insights

Microsoft Teams Call Record Insights

- Call Record Insights is a turnkey application template for retrieving, parsing, flattening, and storing Microsoft Teams Call Records retrieved via Graph API.
- This application enables you to retrieve your tenant's call records, parse them into a meaningful format and store them in Cosmos DB and Kusto without writing any code yourself.
- Because this solution uses Cosmos DB it is highly scalable and because it uses Kusto it is very friendly to application development and deep data analysis.
- The solution is fully deployed within your own tenant. All data processing and data storage is done in whichever tenant you deploy the application.

Q&A

Event Giveaway

Giving away a prize pack for each session. Fill out a survey to be entered.

We will reach out after the Teams Phone Summit to the winners!

If you are a government employee, please fill out the survey and indicate you are not eligible to participate.

Call to Action

- Need a more technical conversation on Teams Phone?
 - Set up a meeting with your Microsoft Account Teams or partner
- Teams Phone POC/Pilot
 - Let's talk about how we can help you with a POC and/or Pilot
- Interested in reducing your IT spend, simply administration and support your users
 - Let's talk about how Shared Calling is the right solution for you
- Let's get started -
<https://aka.ms/TPSSurveyDay1AM>

We want your Feedback!

- Let us know how we did
- Do you need any help with Teams Phone?
- Register for the giveaway

<https://aka.ms/TeamsPhoneSummitDay1AM>

Thank you for attending!!
